

Controller comments

Firstly, please may I thank you all for making the journey to Bulford for a run on the map recently produced by Hugh Drummond. The map itself produced an interesting challenge with its scale of 1:12500 and the fact that the Northing lines had taken a day off. The planner, WO1 (RSM) Mark Poole, put together courses that required both thought and speed on a relatively fast area but encouraged novice runners. The first placed A cse runner beat our estimated time by some margin but the average run time was within our target of an hours run.

The second reason for these notes is to broadcast an apology for the timings and individual splits towards the end of the event. In short we ran out of printer roll and were unable to print off the results. Therefore we carried out the following actions:

- Not to stop people running but to revert to the "old fashion" method of setting people off at a certain time and recording their finish time.
- Asking for honesty in recording their own time. This decision is arrived at because it is a summer event and is primarily for training purposes.
- We stopped printing off the 2nd and 3rd runners in groups to try and save paper (particular apologies to SEAE who were the most affected unit) and asked those with V3 cards to allow their times to be taken from the digital display by the planner.
- The 4 Div hire cards were retained and the results added to the table.
- The results from the event will stand as relatively few people were affected (approx 6 in all) – those that feel this is unfair may approach either WO1 Poole or myself and we will remove their result and have their entry fee refunded (less EMIT hire).

Lastly words of thanks to Mark Poole and his team for planning this testing event and encourage them to plan more in the future!

Captain Jon Kay
